Experience

Taste Labs

June 2026 – Present

Member of Technical Staff

San Francisco, California

- Lead reinforcement learning environment (RLE) design for frontier AI labs.
- Building Slop Bench, a forthcoming public benchmark measuring frontier-model capability to produce intricate, elaborate web designs with high diversity and quality.

Mechanize Inc.

March 2026 – June 2026

Software Engineer

San Francisco, California

- Created reinforcement learning tasks for frontier models, building software engineering environments from large open-source codebases for AI-lab benchmarking and post-training.
- Built the evaluation infrastructure behind these tasks: Docker containers, GitHub Actions CI/CD, and automated grading harnesses.
- Authored task reports on failure modes and calibration metrics for specific frontier models.

Mastercard

August 2025 – March 2026

Software Engineer

St. Louis, Missouri

- Designed RESTful transaction logic powering Apple Pay and Google Pay Tap to Provision integrations for global card issuers.
- Modernized PIN Validation with event-driven flows across microservices, hardening payment-network authorization.
- Built an asynchronous request correlation pattern with Reactive Java Sinks for non-blocking transaction tracking across aggregated services.

Mastercard

January 2024 – August 2024

Software Engineering Intern

St. Louis, Missouri

- Shipped a reusable Spring Boot health check library wired into multiple production microservices.
- Built a Cucumber BDD framework for automated integration testing in CI/CD.

Synopsys

May 2023 – August 2023

Software Engineering Intern

Sunnyvale, California

- Built a containerized web app that lets non-technical users manage Kubernetes clusters through a UI.
- Automated sync of 20,000+ LDAP instances with PostgreSQL via Ruby on Rails rake tasks.

Washington University in St. Louis

July 2022 – May 2025

Teaching Assistant

St. Louis, Missouri

- TA'd Intro to Computer Science (Java), Object-Oriented Software (C++), and Rapid Prototype Development (Full-Stack Web).

Education

Washington University in St. Louis

May 2025

Bachelor of Science in Computer Science

St. Louis, Missouri

- **Coursework:** Data Structures and Algorithms, Database Systems, Object-Oriented Systems (C++), Computer Security, Parallel and Concurrent Programming, Programming Systems and Languages

Technical Skills

AI: Reinforcement Learning (RL), RL Environment Design, Machine Learning, Harness Engineering, Model Context Protocol (MCP), Inference Hosting & Scaling

Languages: TypeScript, Go, Java, Python, Ruby, C++

Frameworks: Next.js, React, Spring Boot, Ruby on Rails, FastAPI, Node.js

Databases: PostgreSQL, Supabase, Redis, MongoDB, SQLite

Cloud & DevOps: Docker, Kubernetes, Traefik, AWS (EC2, Lambda), GCP (Cloud Run, GKE, Cloud Storage, BigQuery, Vertex AI), GitHub Actions, CI/CD
